## SHOULDN'T YOU BE HERE?

Those in the picture, taken at the 1983 Thanksgiving Weekend, remember the good times, the good fun,

the good food, the good talks, the good friends. Join us. More information on the last two pages.

**Del Radomske** of Original Log Homes Ltd. had an interesting class that included a paleontologist, a fundamentalist minister, a train engineer, a 15th year physicist student, a music teacher, helicopter instructor, software creator, forest ranger, cook, and electricians. Add those occupations to some from early classes, students, instructor in judo, fisherman, policeman, psychiatric nurse, heavy equipment mechanic, carpenters, hard rock miners, U.S. marine, and railway worker and you can see what an interesting mix of people we get here. Del's class was also a family session. Del's family was for ten days, Ron's family that include two little boys for Noel and Kelly to play with were here for the duration. A niece was visiting from the States, and with Ken Schuck's wife, Jill and Larry and Kim Charles from New Zealand, meant that we had lots of activity going on.

Del's class got to the header round, as well as completing the roof system,

on a building of Del's design. This will be completed by the present class and put up for sale. Any of you builder's might want to interest a client in it. Write to Bill for details.
